### SAIL

The Switch is a safe and easy to use catamaran sailboat. Ideal for use in lakes, lagoons and protected coastal waters. Some of its many features include:

- » 5 sqm X-ply sail.
- » Beam of 1.9 meters
- » Stable and completely sealed hulls
- » Single sheet rope operation of the mainsail
- » Ideal for the novice sailor and for safe family fun

### MOTOR

Just remove the sail and mast mount (it takes less than 5 minutes) and attach any standard outboard motor (up to 5hp or 25kg of weight) and you have a very stable fishing boat.

With six fishing rod holders, front wells for putting your fish, two bucket holders (for fishing bait, burley or a picnic lunch) and two tackle box holders, it is a well organised and safe fishing platform.

### PADDLE

By simply sliding out the front and rear spars, the catamaran hulls are now two well designed, stable sit on top kayaks. Deluxe seats and a paddle are included in the package and make using the kayaks a pleasure. Whether you are use them for fun, fitness or fishing, you will enjoy the adjustable foot rests, moulded hand holds and many other features.

### EASY

There are no tools needed to change from Sail, to Motor, to Paddle and back again. A simple spring loaded clip system makes assembly and disassembly easy. No trailer required either, as it will all fit on the roof rack as two kayaks and a bag of accessories.

**SWITCH SPECIFICATIONS**

» Length: 3.9m

» Width: 1.9m

» Weight: 77kg

» Max HP: 5hp

# WINGMAN

## MOTOR

With the two kayakers connected by front and rear spars and the transom mount in place, all that is needed is for a standard outboard motor to be mounted on the transom. Any motor between 2hp and 5hp is fine. The catamaran configuration gives the Wingman incredible stability. This makes it very safe for fishing and also makes it very easy to use as a diving platform - as the stability and the low water entry point make getting in and out of the water a breeze. Many other features make it a well organised and safe fishing platform.

## PADDLE

By simply sliding out the front and rear spars, the catamaran hulls are now two well designed, stable sit on top kayakers.
